

Notes 7/18

Cgi – common gateway interface

Set of rules that passes info between web client and web server

ASP.net uses Active Server Page

Static vs. dynamic web pages

Static – mine

Dynamic – Amazon & Google, design changes for individual user

html vs. dhtml (dynamic hypertext markup language) vs. xml, proactive vs. interactive

.php – open source application, to integrate databases with web stuff

“mysequel” open source database

Setup of a Dynamic web page

Seen from public - Homepage index

Site

Noodle – like blackboard

MySequal-database

APACHE-webserver server

Base - LINUX-operating system (ubuntu – the best, redhat - most popular, eudora)

Homework: Research Autorun.exe
