

Accessing Maple 13 for OS X

You need to install a program from microsoft found here
<http://www.microsoft.com/mac/products/remote-desktop/default.mspx>

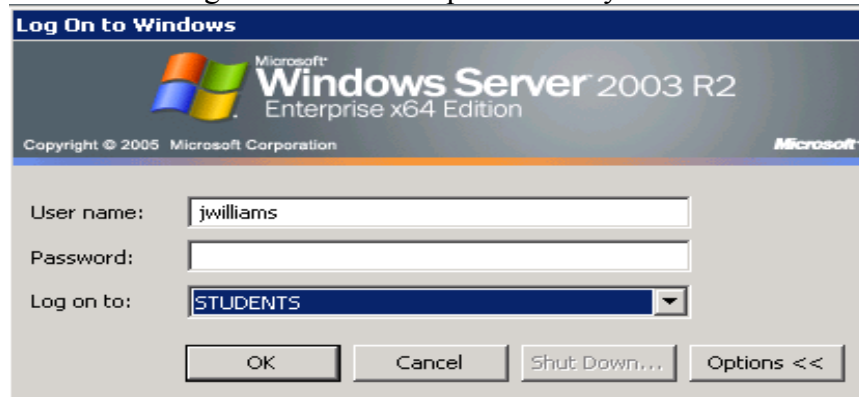

The program is called Remote Desktop Connection Client 2.

Run the program and use maple.hartford.edu for the Computer

Before connecting, click on RDC then Preferences then Drives to set the drives you will make available to Maple.

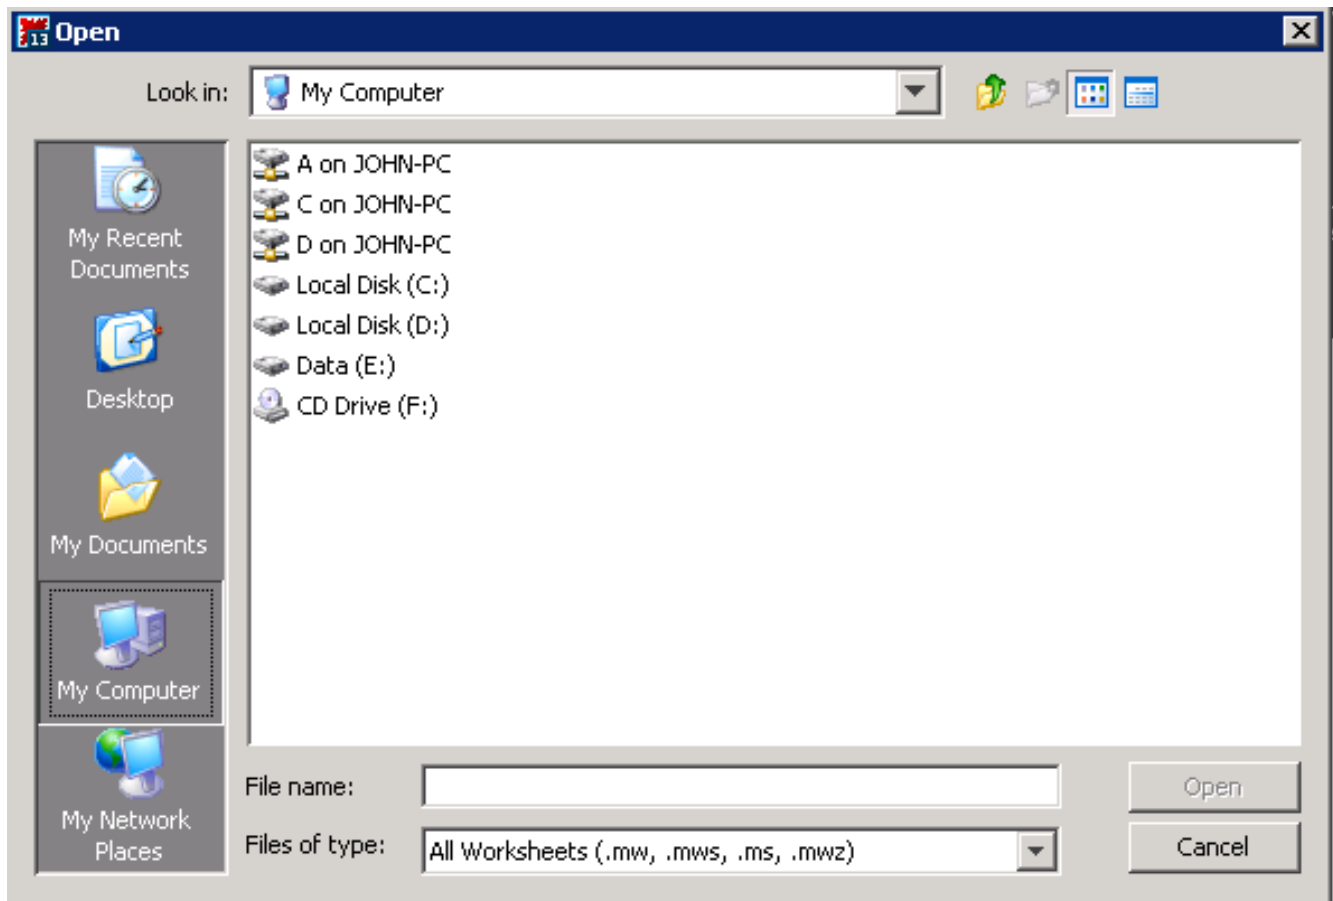

Click through any screens warning about dire consequences and you should reach this screen

User name is your email name and email password. You should log on to STUDENTS.

You will start up in Maple 13.

When you hit file/open you will come to this screen:

Your directory will be A on MyMachine (no PC).
