

Web project

Important points

1. Text files = web pages
2. Web sites need to be neat – FILE structure
 1. A folder for pictures
 2. For attachments
 3. for pages
3. You need to tell the browser where to look for things
 1. Case sensitive -
 2. Naming conventions – always everything lowercase
 3. NEVER put in spaces
 4. Root – the base of the folder or site
 5. These are the ways to navigate
 1. From root into a folder = foldername/filename
 2. Within a folder = filename
 3. From a folder to the root (return to the home page) = ../filename
 4. From a folder to another folder (first to the root, then to the folder) = ../folder/filename
 5. to a site outside your site = http://webaddress
4. basic html
 1. Word
 2. headline
 3. Link to a web page
 4. link to another page
 5. add a picture
5. In NVU
 1. make table
 2. background color

You will make

1. Hi, it's me
2. Homework link page
3. Educational links
