Welcome

NCOPE develops standards for educational programs in the professions of orthotics and prosthetics.
The National Commission on Orthotic and Prosthetic Education (NCOPE) promotes education in the field of orthotics and prosthetics and raises the standards of education in the field. This includes working in cooperation with the Commission on Accreditation of Allied Health Education Programs (CAAHEP) for the accreditation of orthotist/prosthetist and technician level education within the O&P profession. CAAHEP is a nationally recognized non-profit organization that accredits educational programs in 28 allied health disciplines.

NCOPE's additional responsibilities include the development of standards for, and accreditation of Residency education and pedorthic education for the O&P profession.

Resident Spotlight

Meet Sarah Leonard. Sarah received her Masters of Science in Prosthetics and Orthotics from the University of Hartford and is currently completing a dual residency program at Adaptive Prosthetics & Orthotics, LLC in Connecticut. Sarah has a degree in Engineering but once she found out that the O&P field would allow her to work with her hands, interact with others, and problem solve, she was sold! It was an article shared with her by her grandfather about the iLimb that initially sparked her interest. Sarah clearly
remembers the first time she watched a recent amputee take their first steps post-op, the joy they had and the difference a device could make in their life. This winter, Sara had the opportunity to volunteer with Skiers Unlimited, where she helped teach disabled children and their families how to ski.

Complete this form for a chance to be featured on the NCOPE Resident website!
